

CONTENTS

I. Outline of the Noda Institute for Scientific Research	iii
II. Achievement of Research Activities in 2008	v
Reproduced Papers	
K. Tamano, M. Sano, N. Yamane, Y. Terabayashi, T. Toda, M. Sunagawa, H. Koike, O. Hatamoto, G. Umitsuki, T. Takahashi, Y. Koyama, R. Asai, K. Abe, M. Machida Transcriptional regulation of genes on the non-syntenic blocks of <i>Aspergillus oryzae</i> and its functional relationship to solid-state cultivation. Reproduced from <i>Fungal Genet Biol.</i> , 45 : 139–151 (2008) by copyright permission of Elsevier Inc.	1
M. Tokuoka, Y. Seshime, I. Fujii, K. Kitamoto, T. Takahashi, Y. Koyama Identification of a novel polyketide synthase-nonribosomal peptide synthetase (PKS-NRPS) gene required for the biosynthesis of cyclopiazonic acid in <i>Aspergillus oryzae</i> . Reproduced from <i>Fungal Genet Biol.</i> , 45 : 1608–1615 (2008) by copyright permission of Elsevier Inc.	13
T. Takahashi, F. J. Jin, M. Sunagawa, M. Machida, Y. Koyama Generation of large chromosomal deletions in koji-molds <i>Aspergillus oryzae</i> and <i>Aspergillus sojae</i> via a loop-out recombination. Reproduced from <i>Appl Environ Microbiol.</i> , 74 : 7684–7693 (2008) by copyright permission of American society for microbiology	23
Japanese Patents Laid-Open	35
Titles of Oral and Poster Presentations	36
III. Report on the Research Assisted by the NISR Research Grant in 2007	39
Research Grant	
Makoto ASHIUCHI (Kochi University) Effective synthesis of bio-nylon materials using <i>Bacillus megaterium</i>	40
Haruki KITAZAWA (Tohoku University) Development of molecular immunoevaluation system for probiotics	42
Hiroshi MITSUZAWA (Nihon University Junior College) Role of the fission yeast ammonium transporters in nitrogen sensing	45
Ryuichiro SATO (The University of Tokyo) Basic and applied studies on functional factors in fermented foods	47
Young Investigator Research Grant	
Masayuki HASHIMOTO (Shinshu University) Genomic engineering of <i>Lactococcus lactis</i> IL1403	49
Fumitaka KUDO (Tokyo Institute of Technology) Biochemical studies on unique enzymes in the biosynthesis of butirosin	51
Tomoaki MATSUURA (Osaka University) Comprehensive analysis of the effect of <i>E. coli</i> proteins on the translation reaction and its application to protein production	54
Shin-ichiro NARITA (The University of Tokyo) Characterization of the diversity of lipoprotein-targeting mechanisms in proteobacteria	56
Shuji TANI (Osaka Prefecture University) Regulation mechanisms of cellulase gene expression in <i>Aspergillus aculeatus</i>	58
Takeo TOMITA (The University of Tokyo) Mechanism of concerted inhibition of aspartate kinase from <i>Corynebacterium glutamicum</i>	60
Research Grant in 2006	
Hiroyuki HORIUCHI (The University of Tokyo) A novel mechanism of intracellular protein localization in filamentous fungi	62
