

CONTENTS

I. Outline of the Noda Institute for Scientific Research . . . . . iii

II. Achievement of Research Activities in 2009 . . . . . v

**Reproduced Papers**

    C. S. Escaño, P. R. Juvvadi, F. J. Jin, T. Takahashi, Y. Koyama, S. Yamashita, J. Maruyama, K. Kitamoto  
    Disruption of the *Aopex11-1* gene involved in peroxisome proliferation leads to impaired Woronin body formation in *Aspergillus oryzae*.  
    Reproduced from Eukaryot. Cell, 8: 296–305 (2009) by copyright permission of American Society for Microbiology . . . . . 1

    Y. Seshime, P. R. Juvvadi, M. Tokuoka, Y. Koyama, K. Kitamoto, Y. Ebizuka, I. Fujii  
    Functional expression of the *Aspergillus flavus* PKS–NRPS hybrid CpaA involved in the biosynthesis of cyclopiazonic acid.  
    Reproduced from Bioorg. Med. Chem. Lett., 19: 3288–3292 (2009) by copyright permission of Elsevier Ltd. . . . . 13

    T. Takahashi, F. J. Jin, Y. Koyama  
    Nonhomologous end-joining deficiency allows large chromosomal deletions to be produced by replacement-type recombination in *Aspergillus oryzae*.  
    Reproduced from Fungal Genet. Biol., 46: 815–824 (2009) by copyright permission of Elsevier Inc. . . . . 19

**Japanese Patents Laid-Open** . . . . . 31

**Titles of Oral and Poster Presentations** . . . . . 32

III. Report on the Research Assisted by the NISR Research Grant in 2008 . . . . . 33

**Research Grant**

    Taketomo FUJIWARA (Shizuoka University)  
    Development of halophilic protein expression system capable of creating a productive enzyme . . . . . 34

    Masato IKEDA (Shinshu University)  
    Elucidation of genes relevant to microaerobic growth of *Corynebacterium glutamicum* . . . . . 37

    Takashi KAWAGUCHI (Osaka Prefecture University)  
    Establishment of marker-recycling method in filamentous fungi and development of an *Aspergillus aculeatus* multi-auxotrophic host . . . . . 40

    Fujio KAWAMURA (Rikkyo University)  
    Development of a translation system highly expressing the target gene in *B. subtilis* . . . . . 43

    Hiroshi KITAGAKI (Saga University)  
    A research on mitochondria-targeted breeding of a novel brewery yeast . . . . . 46

**Young Investigator Research Grant**

    Jiro ARIMA (Tottori University)  
    Molecular evolution of *Streptomyces* serine peptidase for the synthesis of  $\beta$ -alanyl-histidine . . . . . 49

    Hiroki HIGASHIBATA (Toyo University)  
    Analysis of tRNA modification system in halophilic archaea . . . . . 52

    Takashi HIRASAWA (Osaka University)  
    Fundamental researches on increasing applicability of *Saccharomyces cerevisiae* as the host cells for production of useful metabolites . . . . . 54

    Hisashi MURAMATSU (Kochi University)  
    Molecular breeding of enzymes catalyzing asymmetric reactions: Aimed to provide a non-natural amino acid chemical library . . . . . 57

    Akihiro SAITO (Chiba University)  
    Exploration of novel transporter proteins for oligosaccharides using the ATPase (MsiK) . . . . . 60

    Kaneyoshi YAMAMOTO (Hosei University)  
    Regulation of genes expression on *Escherichia coli* genome with communications among microbes . . . . . 62

**Research Grant in 2007**

    Yasuo OHNISHI (The University of Tokyo)  
    Studies on regulation of secondary metabolism and morphogenesis of *Streptomyces* by DNA microarray analysis . . . . . 64
