

## CONTENTS

<b>I. Outline of the Noda Institute for Scientific Research</b> .....	iii
<b>II. Achievement of Research Activities in 2010.</b> .....	v
 <b>Reproduced Papers</b>	
F. J. Jin, T. Takahashi, M. Machida, Y. Koyama Identification of a basic helix-loop-helix-type transcription regulator gene in <i>Aspergillus oryzae</i> by systematically deleting large chromosomal segments. Reproduced from Appl. Environ. Microbiol., <b>75</b> : 5943–51 (2009) by copyright permission of American Society for Microbiology	1
F. J. Jin, T. Takahashi, M. Utsushikawa, T. Furukido, M. Nishida, M. Ogawa, M. Tokuoka, Y. Koyama A trial of minimization of chromosome 7 in <i>Aspergillus oryzae</i> by multiple chromosomal deletions. Reproduced from Mol. Genet. Genomics, <b>283</b> : 1–12 (2010) by copyright permission of Springer-Verlag	11
M. Ogawa, M. Tokuoka, F. J. Jin, T. Takahashi, Y. Koyama Genetic analysis of conidiation regulatory pathways in koji-mold <i>Aspergillus oryzae</i> . Reproduced from Fungal Genet. Biol., <b>47</b> : 10–18 (2010) by copyright permission of Elsevier Inc.	21
<b>Titles of Oral and Poster Presentations</b> .....	31
<b>III. Report on the Research Assisted by the NISR Research Grant in 2009</b> .....	33
<b>Research Grant</b>	
Hirofumi ICHINOSE (Kyushu University) Comprehensive survey of cytochrome P450 function from <i>Aspergillus oryzae</i>	34
Masashi KATO (Nagoya University) Analysis on the transcriptional regulation mechanisms controlled by the CCAAT-box binding complex as a key factor in filamentous fungi	37
Yutaka KURODA (Tokyo University of Agriculture and Technology) Analysis and prevention of inclusion body in <i>E. coli</i> over-expression systems using short peptide tags	41
Yoichi NODA (The University of Tokyo) Mechanisms of Golgi-localization of mannosyltransferases	43
Kan TANAKA (Chiba University) Studies on novel regulatory mechanism for nucleotide biosynthesis through the amino acid signal in bacteria	45
<b>Young Investigator Research Grant</b>	
Shigenobu KISHINO (Kyoto University) Analysis of peculiar fatty acid transformation by anaerobic microorganisms and application to conjugated fatty acid production	47
Shinya KODANI (Shizuoka University) Study on aerial hyphae formation mechanism of siderophore in the cell of <i>Streptomyces coelicolor</i>	49
Takuji OKA (Sojo University) Identification and application of new genes involved in glycosylation in filamentous fungi	51
Hideaki TAKANO (Nihon University) LitR-mediated photoresponse in non-phototrophic bacteria: studies on its molecular mechanism and potential diversity	53
Seiya WATANABE (Kyoto University) Generation of <i>Saccharomyces cerevisiae</i> capable to ferment hexoses and pentoses derived from lignocellulosic biomass by protein- and metabolic-engineering	55
Yuji YAMAMOTO (Kitasato University) Identification of antioxidant(s) from lactic acid bacteria and screening of high antioxidative strain(s)	57
