<b>III. Report on the Research Assisted by the NISR Research Grant in 2010</b> .....	35
<b>Research Grant</b>	
Keietsu ABE (Tohoku University) Development of transporter-control technology for fermentation	36
Tohru DAIRI (Hokkaido University) Studies on the novel menaquinone biosynthetic pathway and its application to anti- <i>Helicobacter pylori</i> drugs	39
Takayuki SEKITO (Ehime University) The mechanism for vacuolar amino acid compartmentalization and its regulation in the budding yeast <i>Saccha- romyces cerevisiae</i>	41
<b>Young Investigator Research Grant</b>	
Takasumi HATTORI (Waseda University) Metabolic Engineering of <i>Aspergillus niger</i> for production of aromatic compounds	44
Shigeru KITANI (Osaka University) Clarification of new regulatory network for antibiotic production	47
Atsushi KURATA (Kinki University) Development of biomass conversion system with hydrophilic ionic liquid and enzyme from extremophile	49
Nobukazu SHITAN (Kobe Pharmaceutical University) Analysis of plant secondary metabolite transport and application to high production using plant cultured cells	51

So UMEKAGE (Toyohashi University of Technology)	
Functional RNA production using the marine phototrophic bacterium <i>Rhodovulum sulfidophilum</i>	53
Keiko WATANABE (Soka University)	
Construction of a microbial community for effective hydrolysis of the cellulosic and lignocellulosic biomass	55
