

CONTENTS

I. Outline of the Noda Institute for Scientific Research	iii
II. Achievement of Research Activities in 2012.	v
Reproduced Papers	
T. TAKAHASHI, M. OGAWA, and Y. KOYAMA Analysis of the functions of recombination-related genes in the generation of large chromosomal deletions by loop-out recombination in <i>Aspergillus oryzae</i> . (Abstract) Reproduced from <i>Eukaryotic Cell</i> , 11 : 507–517 (2012) by copyright permission of American Society for Microbiology	1
K. ITO, M. MATSUSHIMA, and Y. KOYAMA Gene cloning, purification, and characterization of a novel peptidoglutaminase-asparaginase from <i>Aspergillus sojae</i> . (Abstract) Reproduced from <i>Appl. Environ. Microbiol.</i> , 78 : 5182–5188 (2012) by copyright permission of American Society for Microbiology	3
M. OGAWA, T. KOBAYASHI, Y. KOYAMA ManR, a novel Zn(II) ₂ Cys ₆ transcriptional activator, controls the β -mannan utilization system in <i>Aspergillus oryzae</i> . Reproduced from <i>Fungal Genet. Biol.</i> , 49 : 987–995 (2012) by copyright permission of Elsevier B.V.	5
Y-Min KIM, Y. KISO, T. MURAKI, M-Sun KANG, H. NAKAI, W. SABURI, W. LANG, H-Kwon KANG, M. OKUYAMA, H. MORI, R. SUZUKI, K. FUNANE, N. SUZUKI, M. MOMMA, Z. FUJIMOTO, T. OGUMA, M. KOBAYASHI, D. KIM, and A. KIMURA Novel dextranase catalyzing cycloisomaltooligosaccharide formation and identification of catalytic amino acids and their functions using chemical rescue approach. Reproduced from <i>J. Biol. Chem.</i> , 287 : 19927–19935 (2012) by copyright permission of American Society for Biochemistry and Molecular Biology	15
A. SATO, T. TAKAHASHI, Y. KOYAMA, Y. HANYA Draft genome sequencing and comparative analysis of <i>Aspergillus sojae</i> NBRC 4239. Reproduced from <i>Journal of soy sauce research and technology</i> , 38 : 167–173 (2012) by copyright permission of Japan soy sauce technology center	25
Y. KOYAMA, F. J. JIN, S. HARA Chromosome engineering of <i>Aspergillus oryzae</i> and its industrial application. Reproduced from <i>KAGAKU TO SEIBUTSU</i> , 50 : 577–583 (2012) by copyright permission of the Japan Society for Bioscience, Biotechnology, and Agrochemistry	31
Titles of Oral and Poster Presentations	37
III. Report on the Research Assisted by the NISR Research Grant in 2011	39
Research Grant	
Shigetoshi AONO (Okazaki Institute for Integrative Bioscience, National Institutes of Natural Sciences) Regulation of gene expression by a heme as a signaling molecule in <i>Lactococcus lactis</i>	40
Kenji KOHNO (Nara Institute of Science and Technology) Activation mechanism of ER stress in yeast and mammalian cells	42
Tatsuya MAEDA (The University of Tokyo) Study on the yeast signaling pathways responsive to stresses and starvation	44
Ken-ichi NISHIYAMA (Iwate University) Determination of the biosynthetic pathway of a novel glycolipid involved in preprotein translocation and membrane protein integration	46
Kenji WATANABE (University of Shizuoka) Establishing a new methodology for genome mining and biosynthesis of natural products and their analogs through a yeast molecular genomics	48

Young Investigator Research Grant

Tomoyuki NUMATA (National Institute of Advanced Industrial Science and Technology) The mechanism for biogenesis of the modified nucleoside found in archaeal tRNA ^{lle}	51
Takao OHASHI (Osaka University) Functional analysis of novel glycosyltransferases toward the remodeling of the fission yeast glycans	53
Izumi ORITA (Tokyo Institute of Technology) Genetic engineering for copolymerized bio-polyester production from methanol	55
Takaaki SATO (Kyoto University) Identification of the function of a putative sugar kinase from halophilic archaea	57
Daisuke WATANABE (National Research Institute of Brewing) Study of the high ethanol productivity of sake yeast by comprehensive cellular morphological analysis	59

Research Grant in 2010

Akira NAKAMURA (University of Tsukuba) Analysis of L-glucose metabolic pathway in <i>Paracoccus</i> sp. 43P	62
