

CONTENTS

I. Outline of the Noda Institute for Scientific Research	iii
II. Achievement of Research Activities in 2013	v
Reproduced Papers	
K. ITO, Y. HANYA, and Y. KOYAMA Purification and characterization of a glutaminase enzyme accounting for the majority of glutaminase activity in <i>Aspergillus sojae</i> under solid-state culture. Reproduced from <i>Appl. Microbiol. Biotechnol.</i> , 97 : 8581–8590 (2013) with permission from Copyright Clearance Center.	1
M. OGAWA, T. KOBAYASHI, and Y. KOYAMA ManR, a transcriptional regulator of the β -mannan utilization system, controls the cellulose utilization system in <i>Aspergillus oryzae</i> . Reproduced from <i>Biosci. Biotechnol. Biochem.</i> , 77 : 426–429 (2013) by copyright permission of the Japan Society for Bioscience, Biotechnology, and Agrochemistry.	11
K. ITO, Y. KOYAMA, and Y. HANYA Identification of the glutaminase genes of <i>Aspergillus sojae</i> involved in glutamate production during soy sauce fermentation. Reproduced from <i>Biosci. Biotechnol. Biochem.</i> , 77 : 1832–1840 (2013) by copyright permission of the Japan Society for Bioscience, Biotechnology, and Agrochemistry.	15
Japanese Patents Laid-Open and Japanese Patents Registered	25
Titles of Oral and Poster Presentations	26
Topics	27
III. Report on the Research Assisted by the NISR Research Grant in 2012	29
Research Grant	
Hiroyuki ARAI (The University of Tokyo) Analysis of energy metabolism in acetic acid bacteria during oxidation fermentation	30
Makoto KAWAMUKAI (Shimane University) Development of yeast strains that produce high levels of CoQ10	32
Jun-ichi MARUYAMA (The University of Tokyo) Molecular investigation of Woronin body function and its application in <i>Aspergillus oryzae</i>	34
Hiroyuki MORI (Kyoto University) Molecular mechanisms of the enhancement of protein export by the membrane protein complex SecDF	36
Hiromi NISHIDA (Toyama Prefectural University) Study of <i>Aspergillus</i> nucleosome positioning	38
Young Investigator Research Grant	
Kenji ARAKAWA (Hiroshima University) Analysis of the regulatory genes encoded on a <i>Streptomyces</i> linear plasmid and its application for antibiotic production	40
Naoki KATO (RIKEN) Screening for small molecules that activate fungal secondary metabolite production	42
Hiroyuki NAKAI (Niigata University) Production of Novel Functional Oligosaccharides by Novel Bacterial Phosphorylases	44
Shunichi NAKAYAMA (Tokyo University of Agriculture) Molecular breeding of Clostridia for butanol production from rice straw	46

Keisuke OBARA (Hokkaido University)	
Study on the function of sphingolipids during the starvation response	48
Shosuke YOSHIDA (Keio University)	
Metabolic and enzymatic analyses of a poly(ethylene terephthalate) assimilation bacterium	51
