

CONTENTS

I. Outline of the Noda Institute for Scientific Research	iii
II. Achievement of Research Activities in 2015	v
Reproduced Papers	
M. TOKUOKA, T. KIKUCHI, Y. SHINOHARA, A. KOYAMA, S. IIO, T. KUBOTA, J. KOBAYASHI, Y. KOYAMA, A. TOTSUKA, H. SHINDO, K. SATO Cyclopiazonic acid biosynthesis gene cluster gene <i>cpaM</i> is required for Speradine A biosynthesis. <i>Biosci. Biotechnol. Biochem.</i> , 79 , 2081–2085 (2015)	1
Y. SHINOHARA, M. KAWATANI, Y. FUTAMURA, H. OSADA, Y. KOYAMA An overproduction of astellolides induced by genetic disruption of chromatin remodeling factors in <i>Aspergillus oryzae</i> . <i>J. Antibiot.</i> , 69 , 4–8 (2016)	5
Japanese Patents Laid-Open and Japanese Patents Registered	13
Titles of Oral and Poster Presentations	14
III. Report on the Research Assisted by the NISR Research Grant in 2014	15
Research Grant	
Yuichi HONGO (Tokyo Institute of Technology) Genome analysis of unculturable, fermentative symbiotic bacteria in termite guts	16
Hitoshi SHIMO (Iwate University) Genetic analysis of ethanol fermentation ability of yeast using a next-generation DNA sequencer	18
Akiko SOMA (Chiba University) Construction of highly efficient protein synthesis system by using circular mRNAs and permuted/intronic tRNA processing	20
Akio TANI (Okayama University) Ergothioneine production by methylotrophic bacteria	22
Atsushi YOKOTA (Hokkaido University) Enhanced central carbon metabolism and its application to metabolite production in <i>pdhR</i> -defective <i>Escherichia coli</i>	24
Young Investigator Research Grant	
Chikara KAITO (The University of Tokyo) Identification of the <i>Staphylococcus aureus</i> exotoxin transporter	27
Yoshihiro OJIMA (Osaka University) Mechanism of electricity generation based on the stress response of metal-reducing bacteria	29
Wataru SABURI (Hokkaido University) Functional analysis of cellobiose 2-epimerase and related enzymes and their applications for the efficient synthesis of useful carbohydrates	31
Tomonori SONOKI (Hirosaki University) Enhancement of a platform chemical (catechol) production from cellulosic materials	33
Naoya TAKAKUWA (Hokkaido Agricultural Research Center, NARO) Elucidation of triglyceride accumulation mechanism in an oleaginous yeast	35
Koichi TAMANO (National Institute of Advanced Industrial Science and Technology) Elevation of lipid productivity by enhancing the pentose phosphate pathway in <i>Aspergillus oryzae</i>	37

Young Investigator Research Grant in 2013

Takeshi HAYASHI (Beppu University)

Analysis of a novel physiological function of the respiratory chain of *Zymomonas mobilis* 39

Masahiro NAKAJIMA (Tokyo University of Science)

Isolation, identification, and characterization of a novel polysaccharide degradation enzyme for synthesis of novel oligosaccharides 41
